Flora is word of Latin origin referring to flora, the goddess of flowers. Flora can refer to a group of plants as well as to bacteria.

Importance of Flora to Humans

The flora of plant is so important for us that we can even think about living without them. Plants support life both on the land. Botanists have been writing since the early 1600s. Physicians used Floras for information on medicinal plants while horticulturists used flora to identify plants that might be brought into cultivation. Flora have documented plants collected in exotic places as well as plants growing in a Botanists own area.
