7.1.3 - Describe the facilities in the Institution for the management of the following types of degradable and non-degradable waste

The institution has beautiful lush green campus and its major concern is to keep the campus neat clean and eco-friendly. The students are insisted to reduce waste at minimum extent and advised to put the waste in dustbins placed at different places.

The solid waste is frequently collected by the Municipal Corporation of the town. The various dustbins are used for the waste. Blue colour dustbin is put for dry waste and green colour dustbins are used for the wet waste. They are kept in every classroom waste and is collected once in a day. The college has a vermi-compost unit.

Garden waste, Kitchen waste from ladies hostel and the college canteen and other waste are collected from various places of the campus and put it into the vermin compost. Later it is used for plants in the campus. The institution has made written communication with the municipal corporation Muddebihal for collection and waste management.

The institution has displayed meaningful slogan's to bring the environmental consciousness in the minds of students and stakeholders.

E-waste management : The college has E-waste management. The college has banned the use of CD's, pendrive and advised to use emails. The college has made an agreement with Agencies The damaged e waste is sold out to the agencies

Waste recycling system :

The liquid waste is collected from the various places from the campus. It is dumped into the vermin compost and then it is used for plants in the campus.

To  
The Chief Officer  
Municipal Corporation  
Muddebihal

Respected Sir /Madam,

**Sub:** Disposal of Solid waste from the college premises.

MGVC College officials here by request the municipal corporation to arrange for the collection of solid waste, generated in the college premises on regular basis. This will help the college authority to keep the premises clean.

Kindly do the needful

Thanking you

PRINCIPAL,

**M. G. V. C. Arts, Com. & Science College

## M.G.V.C ARTS,COMMERCE AND SCIENCE COLLEGE,MUDEDEBIHAL

### DEPARTMENT OF CHEMISTRY

#### WASTE MANAGEMENT IN LABORATORY, 2020-21

Hazardous waste is generated by conducting practicals in chemistry laboratories, however the management of such waste has received a little attention from the concerned laboratory assistants and teachers. This year due to COVID-19 Pandemic, the practicals are conducted and waste generated is collected by following the COVID-19 guidelines. Chemistry Laboratory follows the systematic procedure for Solid /Liquid /Hazardous Chemicals Waste Management and for disposal. The chemicals used for practicals are hazardous and waste generated in the laboratory is hazardous in nature in addition to common waste. So the waste management aims to maintain safety and minimise health hazards, environment effects/pollution. The waste generated is managed with safety measures.

- The faculty members, lab assistant and students are strictly instructed to maintain/follow social distance, wear face masks and sanitization inside and outside laboratories during practicals and at the time of collection and disposal of waste.
- The Department uses semi-micro scale techniques in the lab to reduce the production of hazardous chemical waste. A separate storage arrangement is made for hazardous things.
- Dustbins are placed in every laboratory for collecting waste and maintaining cleanliness.
- The filter papers used, waste papers, litmus papers, chemical labels, stationary waste, packaging material are placed in a dustbin.
- Wet waste and plastic wrappers, rubber tubes are collected in a separate dustbins.
- Dustbins with these wastes never allowed to overflow and are emptied and cleaned regularly in a specific place by laboratory assistants.
- All broken glasswares, any sharp object of metal, dirty sample tubes, other items contaminated with chemicals will be collected in a separate bins/boxes and labeled finally are sent to the Municipal waste collection area.
- Empty reagent bottles/solvent bottles in good condition may be re-used within the laboratory after removal of labels and thorough cleaning.
- Hazardous liquid chemical waste of mixed bases and mixed acids, mixed heavy metals, any other generated during and after the practicals is washed with excess water to reduce its potential and allowed to run in to drains to avoid the risk of pollution as this waste contaminate the soil and ground water if not managed properly.
