## Report

### Certificate Course in Seed Technology

The objectives of Seed technology is to increase agricultural production by supply of quality seeds. To assure rapid seed multiplication of desirable varieties. Timely supply of seeds which is well before the sowing season. In India rapid increase in population lead to increase in demand of food grains day by day. So to full fill the demand it is necessary to increase agricultural production by supply of quality seeds to the farmers.

In the Department of Botany we planned to start Certificate Course in Seed Technology to the final year B.Sc students. The students were interested in learning programme. The Seed Technology is also a part of university curriculum. We framed BoS members for developing curriculum for the certificate course.

The Botany Department conducted BoS meeting in our college to frame the curriculum for Seed Technology certificate course. We referred different syllabi of Universities and prepared the curriculum of 34 hours. The Department prepared complete chart of the programme with time table and students allowed to register for the course. Totally 108 students were registered out of 108 students. The curriculum consists of theory and practical classes. In Seed Technology the quality seeds are raised so that seed multiplication will be increased. The supply of seeds at reasonable prices and also with high genetic purity. The percentage of germination is increased. For high physical purity it should be free from other crop seeds and weed seeds.

After completion of the certificate course the certificates were distributed to the students. The students shared their experience that they got complete knowledge with satisfaction and shown interest.
