**“ONE DAY INTERNATIONAL WEBMINAR
ON”**

“YOGA IN NEW GENERATION”

Yoga plays a vital role in keeping the new generation healthy, happy, moral discipline, creative visionary and other aspect of life. Yoga is very essential for coming generation. Yoga has been developed and promoted in different periods of the ancient time. Yoga originated fifteen thousand years back in Himalaya belt and then initially developed to whole south Asian region. That is why our institution has decided to conduct an one day INTERNATIONAL LEVEL WEBINAR ON YOGA IN NEW GENERATION. We conducted several well known yoga expert of international level and our management decided to invite DR.Divya Prabha . Lucy Madam as inaugurator of the webinar and Dr.Yogi Devarajand Dr.Mallikarjun Biradar as resource person. It has been decided to conduct The webinar on 20th July 2021.

Prof. A.B.Kulakarni, administrator S.G.V.C Vidya prasaka trust Muddebihal has given key note address. He told about origin of Yoga and its development in the world. Yoga increases working efficiency, Creativity, flexibility and overall ability to concentrate and focus.

Yoga Cherisris inner res, peace, relaxation and breathing in a very active way. Yoga will help in managing stress, obesity and better concentration and memory. Now days universities are incorporating yoga in their educational curriculum to improve academic performance, to manage stress, well discipline, classroom behavior, concentration and emotional balance. Actually yoga deals good food habit, good sleep, recreation, rest and others.

“RECENT TRENDS IN COHORT ANALYSIS”

Organised by Department of Statistics and an initiative of
Internal Quality Assurance Cell of our college.

REPORT OF THE WEBINAR

Cohort analysis is an important application of statistics in modern days. Cohort analysis is a subset of behavioural analytics that takes the data from given platform, web application or online game and rather than looking of all users as one unit, it breaks them in to related groups or cohorts, usually share common characteristics within a defined time span .

In recent trends, the power of cohort analysis lies in the fact that, it enables not only to view which customers leave and when they leave but also to understand why the customers leave. That is how one can identify how well the users are being retained and also determine the primary factors driving the growth, engagement and revenue.

Shri Ashok.S. Tadasad, chairman of our college Governing body inaugurated this national level webinar on Recent trends in cohort analysis. He Spoke on recent trends in business cohort by giving examples. He told; cohort refers to a group of people who have been included in a study by an event that is based on the definition by researcher. The people borned in 2020 at Bengaluru will be called as birth cohort and like this people

who smoke will be termed as smoke cohort. A cohort effect could be seen in an experiment in which participants use a computer to perform a cognitive task. The result might show that participants in their 20s did vastly better on the cognitive test than participants in their 60s.

He told cohort is any group of people with a shared characteristic. In birth cohort what is common to all individuals is their birth year. In cohort analysis, the study participants are followed over time from weeks to years. The cohort analysis can be applied in business, transportation, production and other fields. Now a days it has got a lot of applications. With these words he completed his inaugural speech.

Before inauguration, Prof. S. N. Bidarakundi welcomed all the delegates and student participants for this National Level webinar on recent trends in cohort analysis. Prof. S. N. Bidarakundi was the convenor for this webinar. He organized the webinar neatly. He introduced Resource person Shri H. N. Patil, planning officer, MSRTC, Pune.

Retired Principal and Professor of Statistics has given keynote address. He told cohort analysis is a tool to measure user engagement overtime. It helps to know whether user engagement is actually getting better over time or is only appearing to improve because of growth.

It proves to be valuable because it helps to separate growth metrics from engagement metrics as growth can easily mask engagement problems. In reality the lack of activity of the old users is being hidden by the impressive growth numbers of new users. Whatever the evaluation key metrics we define for the business; cohort analysis lets us view how the metrics develop

6

over the customer life time as well as over the product lifetime. He said acquisition cohorts are great for identifying trends and the point when people are churning, but it is hard to make actionable insights like to understand why they are leaving, which requires the use of another type of cohorts.

Let us consider an example of App. Long term success for APP developers does not mean only getting Someone to download their App, but also getting them to make repeat visits. To get to the must have value Proposition of your App product, you need go beyond vanity metrics like download counts and even daily active users or month active users that only measure growth and retention. we need to dig deeper into App using a method of cohort analysis.

A traditional cohort divides people by the week or month of which they were first acquired. sometimes segment word is often used instead of cohort. He said cohort analysis is descriptive analytics. Customers are divided in to mutually executive cohorts, which are then tracked overt time. Vanity indicators do not offer the same level of perspective as cohort research, Generally there are three major types of cohort, Time cohort, Behaviour cohorts and size cohorts. Time cohorts are those where in Customers who signed for a product or service during a particular time frame. customers who purchased a product or subscribed to service in the past is called behaviour cohorts. Size cohorts refers to the various sizes of customers who purchase company's product or services. cohort analysis allows us to identify relationship between the population and characteristics and that population's behaviour. With these few words he concluded his keynote address which is very

informative and to update us in recent development in cohort analysis.

We had a very informative and knowledgeable resource person of national importance to this webinar. He served as planning officer of MSRTC Pune. His Knowledge and practical utility of Cohort analysis proved during his Speech.

He explained multimodality, the behavioural phenomenon of using multiple modes of transportation .The Study suggested the useful indicator of an individual's willingness to adopt more sustainable transport alternatives .He told about problems incurred in transportation of Maharashtra state as for cohort data is concerned .He adopted the hierarchical age period cohort model to estimate the net effects of age ,period and cohort on multimodality .The analysis showed that travellers tend to be less multimodal as they get older .The age effects may be moderated by work or physical mobility constraints. The total variance in multimodality accounted for by cohort was larger than explained by periods.

This may be partially explained by the joint influence of multiple spatial mobility constraints as well as by the distinctive early Life conditions and formative experience of baby boomers in terms of driving during the economic expansions.

He has taken his own problems and Solutions by considering Pune division Maharashtra state Road Transportation Corporation data. Indetail he has given what are problems in transportation of buses and how they overcame from such situation by applying cohort analysis process. He has taken a particular problems and prepared cohort table and given

Q improvement points to attract passengers. The example given by him was very informative and understandable by a layman. The delegates are benefitted by resource person.

After the speech of resource person, Prof. N.S. Patil, organising Secretary of this webinar tendered vote of thanks. A feed is taken from each delegate and sent E-certificates to all who submitted feed by through E-mails.

" Synthetic methods of Nanoparticles and Their Interesting properties "

The International level webinar was conducted in our college on 04/08/2021 . The webinar was presided over by principal of the college Prof.S.N.Poleshi. Dr.R.H.Fattepur the Director College development council, Raichur University Raichur was the key note addressor of the webinar and Dr.Rafiq Mulla, Postdoctoral researcher, Swansea University UK was the resource person of the webinar. Prof.S.M.Nimbaigundi, Head of Department of physics was convenor of the webinar and Prof.C.S.Katageri was the organizing secretary. The webinar was conducted by following Covid-19 Pandemic rules regulations , Government of Karnataka .This Webinar Internationally Claimed Professors , Researchers , our staff members and several college students were participated online by Google platform.

The program began sharply at 03:00 PM by using Google meet online platform. The Function was started with Saraswati blessing song. The program Inagurated by Shri Ashok.S. Tadasad Chairman, College Governing Body and Secretary, S.G.V.C.V.P Trust Muddebihal.

The Keynote Speaker **Dr. R. H. Fattepur**, Director College Development Council Raichur University, Raichur delivered a lecture on "Nanoscience". He explained in detail regarding-

- Introduction of Nanoscience
- Properties of Nanogold materials: Color& Size
- Nanotechnology used 2000 Years Ago in India to make History's Sharpest Swords
- What makes Nanotechnology so Unique?
- Surface area: Volume (S: V) ratio-
- Size Dependent properties : At the nanometer scale, properties become sizedependent.
- Quantum effect (size)
- Charecterizatiqn Technology
- Application of Nanotechnology
- Metal Based Nanomaterial + Application

- ❑ Nanotechnology in Construction Engineering
- ❑ Nanotechnology in Cement, Concrete, Steel, Glasses, Solar Panels
- ❑ Self Cleaning Buildings and Roads using Nanomaterials
- ❑ Nano house he has actively interacted with participants in the Question- Answer session.

The Resource Person **Dr.Rafiq S. Mulla**, Postdoctoral Researcher, Energy Safety Research Institute, Swansea University United Kingdom, UK delivered a lecture on "Synthetic Methods of Nanoparticles and their Interesting Properties" he explained in detail regarding-

- ❑ Introduction to Nanoparticles [Nanomaterials
- ❑ Different Forms of Nanomaterials
- ❑ Synthetic Methods
- ❑ Properties and Applications
- ❑ Conclusion he has actively interacted with participants in the Question- Answer session.

Prof. Miss Arpita Sajjan Presented the Programme , Principal Prof. S. N. Poleshi welcomed, Organizing Secretary & HOD of Chemistry Prof. C. S. Katageri Introduced the Keynote Speaker Dr. R. H. Fattepur, Convenor & HOD of Physics Prof. S. M. Nimbalgundi Introduced the Resource person Dr.Rafiq S. Mulla, Prof. Miss Laxmi Hadapad extended the vote of thanks.

Totally participants across the countries had registered. E-certificates were issued to participants, who have attended the webinar.

I take it as an opportunity to thank our beloved college chairman Shri A. S. Tadasad for his support and co-operation and I also sincerely thank Principal Prof S. N. Poleshi for his timely guidance and support. I thank all those who have directly and indirectly supported in the successful completion of this webinar. I also thank all the participants for their support and quick response.
